The IDS's received 1/27/03, 3/28/02 and 11/19/01 have been entered and claims 15-34 are currently pending in this application.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

In claim 15 the last step does not accomplish the preamble, a correlating step is suggested. In claim 15(b) "the generated light" lacks antecedent basis. In claim 16 the hyphen after calcium may be intended to be deleted.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bryan (6,232,107) teaches detecting calcium with aequorin.

Rosen (5,876,960) teaches detecting spores.

Rajan (Spore Research) teaches endospore chemistry.

Shimomura (Biochem J) teaches EDTA and aequorin.
